

PINNACLE COLLECTION

Premium composite fencing, considered as part of the garden.

An introduction to the Pinnacle approach: design-led systems, six curated finishes, black aluminium framing and a guided route from inspiration to quotation.

The collection

Pinnacle is designed for homeowners who want the boundary to contribute to the architecture of the garden rather than simply enclose it.

- 01** Four system directions: Full Privacy, Slatted Top, Decorative Screen Top and Ground-Fixed Posts.
- 02** Six curated board finishes: Dark Grey, Black, Light Grey, Teak, Chestnut and Ancient Wood.
- 03** Satin-black aluminium posts and rails create a consistent architectural frame.
- 04** Complimentary finish samples support final colour selection in natural daylight.

The buying journey

The website is designed to give customers useful information before a formal quotation is prepared.

- 01** Explore garden collections and system options.
- 02** Use the live configurator for an indicative project price.
- 03** Upload photographs or a sketch for design assistance.
- 04** Receive a project-specific quotation and coordinate delivery.

Why composite

Composite is selected where homeowners value consistent appearance and lower routine finish maintenance.

- 01** No routine painting or staining of the composite boards.
- 02** Designed to resist rot associated with conventional timber.
- 03** Clean manufactured board profiles for repeatable architectural lines.

04 Occasional cleaning is generally all that is required for routine care.

Important

This guide is intended to support early-stage planning. Site conditions, structural requirements, fixing methods, dimensions and installation details should be verified for the individual project before ordering or installation.
